Bioniser™

Traditional pool maintenance has been to “shock” the water with chlorine...this process oxidizes contaminants that cause cloudy or dull water. If an Eco Oxidizer is attached to your pool system the water stays healthy, fresh and clear without any toxic substances polluting your swimming pool environment.

The Eco Oxidizer goes to work whenever your pool pump and filter are running... it utilises a safe, low DC current that passes between two specially coated, long life titanium electrodes. This process oxidizes (eradicates) contaminants from your pool.

As the unit consumes very little power it is a far better option than continuing to use harsh chemicals to regularly oxidize or shock your pool water. Chloramines and other nasty compounds that are created when chlorine combines with organic matter such as skin or hair, are destroyed on contact.

So... Now there is no requirement to “shock” your pool because the powerful Eco Oxidizer literally tells you that your pool water is out of balance. You can check and rectify your pool’s Calcium Hardness, Phosphates or Total Alkalinity levels well before they reach critical imbalance levels because a cloudy pool that has an Eco Oxidizer is really saying “hey check my balance levels”.

Wishing your pool would look sparkling clear is now a wish come true. Installing an Eco Oxidizer is a fitting way to get your wish... a fresh, clear and healthy pool without the chemicals and the fuss.

Eco-Oxidizer Titanium Cells

I am living in the stone age no more as far as my pool is concerned. The Bioniser was good enough on it's own and then I added an Eco Oxidizer so no more shocking the pool with Oxy Shock...the same result but way less cost and hassle. Very Pleased.

- JS Noosa Heads

I installed a Bioniser plus a pH Boss plus an Eco Oxidizer several months ago. Then I witnessed what natural pool care was all about... I still have to do a few water balance tests every few weeks but this is getting close to the goal... a hands free pool

- MS QLD

Bioniser is committed to creating a healthier environment... the Eco-Oxidizer is one integral component of our ongoing journey in this direction. Our other products also were created to advance us all along the path back to a toxic free world. They include the fully digital Bioniser all natural pool and spa purifier, and also the amazing pH BOSS, totally automatic pool pH controller.

Our clients are our major focus and we do not rest until each individual client is happy with their Bioniser product and understands the Bioniser difference. The difference the Bioniser makes to pools is profound but in fact the difference in operating parameters between other pool systems and the Bioniser System is small. There is no mystery and no “extra hassle”, normal pool care is still the system you will continue to follow.

This is the Bioniser “Ultimate Eco Solution” to Pool Care... and your commitment to help us all return to a toxic free Planet for your children to enjoy. This is the Bioniser promise to you.
