

# No More Annoying "pH Creep" or Costly, Time Consuming Algae Attacks Again!

**pHBOSS**  
Auto pH Control

- ✓ Eliminate "pH Creep"
- ✓ Never Test pH Levels Again
- ✓ Reduce Pool Chemical Use
- ✓ Nullify Sudden Rises in pH Levels
- ✓ No More Sudden Algae Attacks
- ✓ Maintain Vital pH Balance Constantly
- ✓ Reduce Acid Use Significantly
- ✓ A Pool Owner's Best Friend

For Info Call 1-855-8-IONIZE

**pH Boss is your "Set and Forget"  
Auto pH Control Solution to "pH Creep"...**

**pH BOSS™ Auto pH Control System**

Take note of the few "do's and don'ts" and you will have a simple and trouble free start up.

Bionizer Ltd is committed to creating a more healthy environment... the pH BOSS is one integral component of our ongoing journey in this direction.

Other components to advance ourselves along the path back to a toxic free world include the original Bionizer Bio-effective ionic pool and spa purifier, and also the Eco-Oxidizer chemical free pool oxidizer.

Now for the first time pools are able to stay healthy and clear without any toxic substances polluting your swimming environment or your lifestyle. You are removed from all but the most simple tasks required for pool care.

If you use a pool care service you can reduce the time they visit... they are now almost redundant. Let them visit once a month and sweep the pool, check the skimmer and add some acid to the pH reservoir and you do no pool care whatsoever.

This is the Bionizer "Ultimate Solution" to Pool Care... and your commitment to help us all return to a toxic free Planet for your children to enjoy.

pH level is one of the most important pool balance parameters for any type of pool. Whether the pool is ionized, ozone, salt water chlorinated (including salt chlorinators that use alternative salts such as magnesium and potassium), liquid chlorine etc, the pH must be maintained at the correct level for optimum water quality and algae control.

The pH BOSS takes the hassle out of controlling pH, by doing the job for you. Whenever the pool filtration pump is running, the pH BOSS will add small, frequent doses of diluted hydrochloric acid to ensure correct pH at all times.

This not only saves you time, but it also takes the guesswork out of color matching with pH tests and reduces chemical usage. In particular, the small doses will not reduce total alkalinity as quickly as adding a larger amount of undiluted acid every week or two.

So the pH BOSS saves you time, frustration AND money!

Before installing the pH BOSS, the pool water should be correctly balanced, particularly total alkalinity. The pH BOSS can be safely used on brand new pools, including those pools which have high acid demand for the first few weeks, months and years of operation.

It monitors and balances your pool's pH levels...even while you sleep!

## Testimonials...

I just thought I'd touch base with you, since it has been just on 3 months since I got my new pH BOSS controller. I have to tell you, I am VERY impressed. The drum of diluted acid that I made up when I first installed the unit is still not empty, 3 months later. Every time I go to check the reading, it is exactly at the pH7.3 set point that you suggested. I have had to do absolutely nothing about pH control since I got this little gem. Making up a drum of diluted acid only took me about 5 minutes. I think 5 minutes every 3 months is quite manageable! And I'll tell you something that I had not expected : In the past, my local pool shop also used to get me to add 4 to 8 kg buffer every time I went there for a water test. Since I got the pH BOSS, I have only had to add a couple of kilograms over the whole 3 months. Am I correct in guessing that the more constant and gradual acid addition is better for Total Alkalinity than adding a big slug of acid every week or two?

Now that I have the original Bionizer and the new pH BOSS, other people I know are getting insanely jealous that I come out of the pool shop with \$10 worth of acid every few months, and they are buying \$150 of salt, stabilizer, buffer and acid every few weeks ! I can't wait to see what you guys come out with next. Please make sure you keep me on your mailing list.

Regards,  
M.S., Q'LD

As you know we operate a 15,000 gallons pebblecrete pool that is shared by 16 apartments half of which are holiday let.

I would like to share my appreciation for the Bionizer and the pH Boss and the Eco Oxidizer that we have had (Bionizer for years now) on the pool for the last 8 months. In this time we have almost halved our usual acid consumption and reduced our buffer and calcium hardener greatly as well. The pool is just so easy to maintain now and all the tenants and guests have frequently commented on the water quality and how their kids just love our pool water ...no stingy.eves or chlorine smell. We notice the birds drinking the water often and that must be their vote of confidence on just how good that water tastes! Thank you for showing us the way to a true eco pool... the pH Boss is a must have from now on.

J .5. Noosa Heads

I have had my Bionizer and pH Boss for four months now.

After learning how to use them I find that my pool is crystal clear and the pH Boss is just great!

I am now using the vacuum tube heating system in my pool and the only reason I can use this advanced system is because I have a Bionizer chlorine free pool.

My friends with salt pools are all lining up to put a pH Boss on their pools... what about some commission!
